

## Cubs Transition Information Letter

Welcome to the GymKats Cubs Transition class - we are excited to have your child in our program!

**GymKats Program Focus:** GymKats values an environment of different skill levels, mixed ages and co-ed classes, as it allows for modeling and teaching that is invaluable to the learning experience. Coaches strive to teach each child at their own ability level – to ensure that they are on their learning edge. Progressions for skills are used to adapt stations to make them suitable to each child's level.

### **#1: Why is my child learning “popcorn” and “egg rolls”?**

Fun is the Name of the Game! Coaches rely on imagery and verbal repetition to teach and correct skills. We believe that making the class fun and using words and phrases that are memorable will make it easier for children to learn the skills. We are teaching FUN-damentals every step of the way. By breaking the skills down into fun progressions, we are allowing children to experience success, which will build motivation and self-confidence.

### **#2: What happens during a class?**

At this age, coaches focus on introducing gymnastics shapes and elements, as well as fundamental movement patterns, cognitive and social skills. We typically teach the same lesson for two weeks, with minor changes, as it helps the children remember the skills. GymKats programs teach physical, cognitive, and social skill development.

*Sample List of Non-Gymnastics Skills Taught in Cubs Transition Class:*

- 1. Physical Skills:** Gross motor skills, fine motor skills, coordination, agility, balance, and strength
- 2. Cognitive Skills:** Directionality, laterality, patterning, spatial awareness, communication, and problem solving
- 3. Social Skills:** Cooperation, communication, self-confidence, group social skills, and following instruction

### **#3: Am I allowed to leave my child for the duration of the class?**

All parents and caregivers are asked to stay for the first class, in order to ensure that children transition well. Children must be able to follow their coach and group in order to remain in the class. We ask that parents and caregivers allow coaches to guide the children, and if necessary, we will reach out to you if we require assistance to aid your child. As much as we know that you want to help us with group organization, coaching your child when they are in their group can be distracting to the child, the coaches, and disrupt the class rhythm.

### **#4: What should my child wear to class?**

Children should be dressed in comfortable clothing and go barefoot. Please note, baggy clothing, long pants (pants that are longer than ankle bone), and dresses should be avoided, as they can be present dangerous tripping and catching hazards. Please remove your child's loose jewelry, and tie hair out of their face. Tights or socks can cause

children to slip while climbing.

**#5: Do I need to bring anything else?**

A water bottle and a child with a big smile!

**#6: What do I do if my child is sick?**

If you or your child is ill, please stay home and rest to minimize the spread of illness and improve recovery. Please contact Coach Ashley in advance, and we will do our best to schedule a make-up class. Please note – we do not guarantee the ability to schedule a make-up class, as we have strict class ratios. That being said, we typically try to offer one make-up session for illness per session.

We are very excited to see you on the first day of class – there will be plenty of somersaults, swinging, and smiles!

If you have any questions or require clarification in the meantime,  
please contact Coach Ashley at (647) 227-5231, or at [gymkatsinc@gmail.com](mailto:gymkatsinc@gmail.com).
